

- TRL 7: System prototype demonstration in a space environment
TRL 8: Actual system completed and "flight qualified" through test and demonstration (ground or space)
TRL 9: Actual system "flight proven" through successful mission operations

Acknowledgments

This document summarizes the efforts of many participants, all of whom were essential to the successful evaluation of power systems for a HALE ROA. The authors gratefully acknowledge the contributions of the following individuals: Chellappa Ballan, William Bigbee-Hansen, Dan Birmingham, John Cirillo, Dave Daggett, Sarah Fischer, James Harp, Richard N. Johnson, Gerry Miller, Fred Mitlitsky, Keith Patch, and Tina Stoia
